1 of 1 people found the following review helpful. Decent map able to take abuseBy ajk170Used this map on our trip last August and turned out to be a good map that's able to take an abuse of being crammed into a bag, folded and re-folded (incorrectly), can take markings with fine tip markers and pens- but not pencils. We used little sticker dots to mark locations of interest because marking in markers seemed to get lost against the different colors of the map. This one also pre-marked location as well- which is good if you don't really know the address but know proximity of one thing to another. This map also has a coating on it so it makes it rain proof but not totally waterproof. The scale was decent and it had other localities inset- such as Versailles- but it didn't have it on the main map. The "zoomed-in" scale made it easier to traverse the streets rather than a larger "zoomed-out" scale would as would be the case if the main map actually had Versailles on it. The northern portion of the map captures the Sac Coeur and northern end of Paris - didn't pay too close attention to the eastern, southern, and western edges of the map. Held up so well that we're able to use it again for the next time- really liked the fact that folding it in different ways to make smaller just to see the view that I needed didn't result in ruining the map with multiple fold lines.

An easy-to-use and detailed street map of Paris and a road map of the North of France. The best way to plan your trip and to travel independently in and around Paris. This map contains a small plan of Paris metro lines and the road map of the North of France includes Normandy, Picardie, Ile-de-France, Champagne-Ardenne, and the Loire Valley.
