Just an A to Z list with one page per verb that is covered with a giant conjugation table. At the bottom of each verb page there are 2-3 example sentences in tiny font. If that's all you want great. But I was hoping to have exercises to USE these verbs in context. I believe this to be the method of learning. Unfortunately, all of the exercises are conjugation of basic verbs like jugar and ir. The main purpose of this book seems to be conjugation, rather than vocabulary building. I am disappointed. The software cd: The included cd has a simplistic flash card program called "before you know it". You pick a list and then a voice will correctly pronounce the words to you and you can click yes or no if you know the word or not. Unfortunately, the program doesn't seem to care if you mark a word as having known it already and will blindly go through the list repeating the same words over and over again. Furthermore, the vocab words on the CD have NOTHING to do with the words in the book. There's five lists of Spanish verbs, but these are basic Spanish 101 verbs NOT the 2000 verbs in the book. What a joke. 0 of 0 people found the following review helpful. Five Stars By Mary Kaapke Very handy book for learning verbs, which have always been difficult for me. 0 of 0 people found the following review helpful. Barron's is better and easier to read By Customer This text conjugated only 250 verbs, not 2000. It lists more than 2000, but does not conjugate them. Barron's 501 verbs conjugated 501 verbs and lists an additional 2000 plus just like this book. There are other useful sections, but Barron's also has them. One huge negative for me is the text is very faint and hard to read. Barron's seems to have the same size text but it is dark, or bolded, and much easier to read. I now see that this one comes in large print. If you choose this over Barron's, I recommend you get the large print.
