Research size, scale and density before buying By Matt McAdory Should have better researched the size and scale with the amount of info that is included on the maps. Too high density for me to be very useful. Size make it very portable but the density of the content is too high for me to find it very useful. 0 of 0 people found the following review helpful. Five Stars By Customer all is good 0 of 0 people found the following review helpful. Just a bit too handy! By Nick Collins Not enough detail and too small to add much to Google maps.
