**Linda J. Spielman : A Field Guide to Tracking Mammals in the Northeast** before purchasing it in order to gage whether or not it would be worth my time, and all praised A Field Guide to Tracking Mammals in the Northeast:

1 of 1 people found the following review helpful. Practical, insightful field guide filled with diagrams. By Skye This book is a pleasant, well-organized, thoroughly scientific, and easy to understand guide to tracking mammals in the northeast portion of the United States. With drawings and photos of tracks taken by the author and diagrams for different mammal gaits, this is a very useful field guide for a practice that has always been and will continue to be

incredibly useful as long as there are living creatures on this Earth. This guide is useable regardless of one's personal tracking experience level, and it is organized by specific mammal groups. The text is thorough yet easy to understand, and there is a glossary in the back for easy reference if one is not familiar with tracking terminology. If you're interested in tracking, nature, or just enjoy learning, this field guide will more than suffice. 0 of 0 people found the following review helpful. A treasure map for natureBy Ann Marie AckermannAny walk outdoors can be a treasure hunt, and with Linda J. Spielman's new book, you have a treasure map. This book will help you identify the tracks of common mammals in the Northeast -- and unlock some of their secrets. A strong point of this book is that it shows more than one version of an animal's tracks. Tracks can appear different based on the ground, weather conditions, and age, and by offering sketches of the same track in a variety of different conditions, this book increases the reader's chances of making a correct identification. That should translate into hours of fun outdoors.

The ultimate resource for mammal trackersAs more people come to value the natural world and venture into wildlife areas, a reference to help identify the animals who call these places home has never been more useful. A Field Guide to Tracking Mammals in the Northeast gives you all the details necessary for following animals large and small from chipmunks and woodchucks to bobcats and black bears. Meticulously drawn illustrations and informative discussions provide the user with an array of tools for identification unmatched in any other tracking book. This guide also includes thorough discussions of distinguishing features, illustrations of scat, notes on other signs and habitat, measurements for tracks and gaits, and diagrams of characteristic gaits. Lightweight, portable, and comprehensive, this book is an ideal tool for trackers at all levels.

About the AuthorLinda Spielman is an environmental educator and leading expert in animal tracking, having studied it for more than 25 years. She coordinates the Ithaca chapter of Keeping Track, Inc. and leads the Ithaca Tracking Club, conducting tracking workshops and outings for trackers of all skill levels. She lives with her partner and dog in upstate New York.
