By Mark Los Angeles is a wonderful city so full of interesting things. This book has it all. All the areas are greatly photographed and look clear. LA's smog problem seems to be subsiding as the photos show clear days (most of them) and LA is only getting better. Every part of the city is shown. If you like photos from the air, you'll like this book. Also, the Library tower is shown (this is the first building to get blown up in the movie "Independence Day") in several photos. The older printings of this book didn't have them in it. I highly recommend this book. 0 of 0 people found the following review helpful. Five Stars By Sooboo Excellent condition, especially for an older book. Exceeded expectations.
