Such a fun book to read, as Stuart and Joanne ("Death Rider" and "Cinderella") kept me smiling and laughing as they prepared for and rode their bikes all the way across the US of A. They both have a witty way of writing that keeps you turning the pages to see what they will face on the next legs of their incredible journey, and how they will successfully pedal to their next stops. What does one think about when you see huge hills and more than 100 miles in front of you, and you barely have trained (well, one of them) before starting a 3500-mi bike ride? What hidden treasures in this vast country will they discover next, which you can see only from a bicycle? And what about the Dairy Queen Mystery?? Anyone even remotely thinking about riding across the country will treasure this

book, and anyone who is serious about it will absolutely benefit from their lessons learned and their suggestions for making such an adventure more successful/enjoyable. You will love this account of how regular folks can achieve the extraordinary!0 of 0 people found the following review helpful. A Great Read For Your Average JoeBy CustomerI am almost certain that I will not attempt an adventure like this but I thoroughly enjoyed hearing how these two managed to make their way through it all. The color pictures and the descriptions are great too. I had no idea that Route 66 doesn't really exist anymore.0 of 0 people found the following review helpful. What a fun read! I don't cycle muchBy JennWhat a fun read! I don't cycle much, but it felt like I just took a trip across the country. Thanks for giving both your perspectives too.

Have you ever wondered what it would be like to do something outrageous like riding a bicycle across the United States? So did Joanne and Stuart, a couple from California who only started cycling a few years earlier in their late 40s. Not the hardcore backpack types who sleep in a tent on the ground, they decided to attempt this adventure with the support of a group that knows what they are doing. They each give a vivid account of the journey from their own perspective along with hundreds of descriptive full color photos to bring each day to life. Whether you want to live vicariously through their experience, are thinking of trying something similar, or dont care the least about cycling and just want to follow the highs and lows of this 50 day adventure across small town America, then this is a must read. Also available in lower cost Black White print and Kindle Color e-book versions.
