Mark W. Nolting : African Safari Planning Map to East and Southern Africa before purchasing it in order to gauge whether or not it would be worth my time, and all praised African Safari Planning Map to East and Southern Africa:

0 of 0 people found the following review helpful. Must have for safari planning By M. Johnson If you are headed to Africa to go on safaris, THIS is the map for you! Much better than the Michelin map I ordered originally for my purposes. 0 of 0 people found the following review helpful. Valuable safari planning tool By Michael 2131 As expected. Nice layout and it puts a lot of essential information in one handy location. Definitely recommended. 1 of 1 people found the following review helpful. Definitely fo planning By CF Good map for deciding where you want to go, but not really enough detail for use when you get there.

Printed on waterproof, tear-resistant paper, this is the only Safari Planning Map to Africa on the market and includes key elements essential in planning a successful safari. This full-color map is large (38.25" x 26.5") and is in itself a work of art by Mark Nolting, the author of Africa's Top Wildlife Countries and the African Safari Journal and Field Guide (each with over 200,000 copies in print). The map emphasizes the wildlife areas and provides information needed to plan a safari, whereas other maps focus on intricate road systems etc. which are irrelevant to most international safariers, as they either fly from camp to camp, or they are driven by guides. Side 1 includes: All the top safari countries and important wildlife reserves in East and Southern Africa "When's The Best Time to Go for Wildlife Viewing" chart "What Wildlife is Best Found Where" chart Temperature and Rainfall charts Side 2 includes: Enlargements of the two key regions visited by most travelers: The Okavango Delta (Northern Botswana) to Victoria Falls, and Northern Tanzania and Southern Kenya The Great Serengeti Migration The Okavango Delta Flood (inundation) Enlargements of other popular reserves The location of the best safari camps and lodges

[T]he Africa Adventure Companys Safari Planning Map were useful starting points for us, providing practical tips (when specific parks are open, which species can be experienced where, etc.) and helpful charts that made the planning process a lot simpler. National Geographic
