I absolutely love the Benchmark maps and own nearly every state in the series, aside from Arizona and New Mexico. They are my favorite atlas, hands down. When I moved to Alaska in 2015, I was immensely disappointed to find they didn't produce an Alaska atlas. I even sent them an email requesting they do so, because I'm such a fan. Maybe that had something to do with it, but I saw the Alsaka version in Seattle when I was visiting the lower 48. I was giddy and ordered it that same day from , didn't even think twice. I've spent several hours perusing the maps and it's mostly the same quality you'll find in the rest of the series. About my only complaint is that they use a much larger scale for much of Alaska. Understandably so, I suppose, given that Alaska is 1/5th the size of the continental US and there's literally NOTHING in these places. For the places I'm intimately familiar with in Alaska so far, the maps appear to be accurate. I do miss some of the fun details you'll find in the other states like Montana, where they detail Bigfoot sightings. (Who knows, maybe they're written off as homesteaders here?) It has been enjoyable to review the coastlines, islands and extensive mountain ranges around the state though. As expected from Benchmark atlases, there is simply a ton of information presented throughout the atlas. There are some unique sun/darkness schedules shown, which I don't recall seeing in other states...probably because we have such different light cycles up here. These maps are way more accurate, fun and enjoyable to use than other maps of the state. I would strongly recommend buying this one if you're visiting Alaska or especially if you live here. If you're shopping for one, get this one!

3 of 3 people found the following review helpful. Benchmark Alaska appreciated. By Carol Anne ThewWe were delighted to see benchmark add Alaska to their collection. As with their other states, a great resource. We use all of them extensively. We are headed to Alaska this summer appreciate the timing of the Alaska edition.

Alaska truly is the Last Frontier. No other publication can display this rugged scenery and recreation potential with more precision than Benchmarks Alaska Road Recreation Atlas. The Landscape Maps reveal landforms with amazing realism and detail, clearly showing how the states vast network of roads, waterways, and recreation landmarks fit into the landscape. A complete Recreation Guide lists a myriad of outdoor activities. Arranged by category and boasting unequalled insight and detail, it is the ideal planning tool from a simple scouting trip to an extended exploration. Benchmark field-checkers drove several thousand miles to make sure the Alaska Road Recreation Atlas is the most accurate, comprehensive, and reliable map product ever published for the 49th State.
