John Tomikel : Alaska Highway Journal before purchasing it in order to gage whether or not it would be worth my time, and all praised Alaska Highway Journal:

This is a reprint of the well received original text with material added that was previously omitted. Gasoline was in short supply and the couple decided to make the trip before the situation became really desperate. This chronicle of

traveling the highway before it was paved and motels built is a classic in low-key adventure literature. They sleep in the back of their pickup truck, cook over a Coleman stove and bathe out of dishpan. Good reading.

About the AuthorDr. John Tomikel is a well known outdoor writer and has authored many books. He writes a weekly outdoor column for the Erie Morning News.
