What a great map!! Lots of detail and the state is together, not chopped up to make it fit better on the page. This is the best map I have seen of Alaska. Very high quality, which is what I have always found with National Geo. maps.

By Benjamin C Hallowell
Too many labels in too small of a font make this map too difficult to read. The cartographer attempted to label absolutely everything which resulted in a tangled mess of labels that were too small to read and obscured the features they were meant to identify. It would have been much better if the cartographer was more selective in which features to label. If you want a reference map of Alaska to put on your wall don't buy this map. I bought this map and returned it because it simply wasn't functional as a reference map.

By C. Abel
Got this for a gift. My dad loved Alaska.

One of the largest and most detailed maps available for the North Star State. Rich shaded relief makes Alaska's incredibly diverse terrain easy to visualize and remarkably beautiful. The map includes hundreds of named places including primary and secondary towns, political boundaries, infrastructure, hydrography, national parks, state parks, wilderness areas, major peaks, military reservations, and more. It shows Alaska in its entirety, including the entire 2,200 mile Aleutian Island chain that when mapping it in detail, cartographers almost always break it into sections for convenience. This map, however, portrays the entire State at the same scale on one wide sheet offering an unparalleled perspective on Alaska's true size. Also found on the map is an inset map which displays Alaska's relative size to the conterminous U.S. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:3,660,000 Sheet Size

= 40.5" x 30.25"
