I ordered this book along with Susan Peterson's "Fun and educational places to go with kids and adults in Southern California," hoping to find good family expeditions. Sad to say, "Fun with the Family" suffers terribly from the comparison. It's not that it's bad, it's just that it's a very generic, lightweight guidebook that mostly covers places I already knew about. It would be fine for a family who is visiting and wants the highlights of where to go with kids, but I'm looking for interesting weekend expeditions that aren't theme parks or museums. In that case, I'll definitely go with the Peterson book, which is literally four times the size, much more comprehensive, and full of interesting places you won't find in every other Southern California guidebook.

Geared towards parents with children between the ages of two and twelve, Fun with the Family Southern California features interesting facts and sidebars as well as practical tips about traveling with your little ones.
