Tui De Roy Moore : Galapagos: Island before purchasing it in order to gage whether or not it would be worth my time, and all praised Galapagos: Island:

4 of 5 people found the following review helpful. Galapagos, Islands Lost in Time By Brad Isley 19 year-old Tui De Roy Moore was discovered on the Galapagos Islands by the editor of Audubon magazine, Les Line, in 1972. She had been living there since she was 2 years old with her Belgian parents. Her skill with a basic 35mm camera and Kodachrome is breathtaking, as was witnessed by the cover of Audubon magazine a few months later. Since then, she has published another book about the Galapagos Islands and traveled the world building up an impressive nature and wildlife stock photo portfolio. She even served as associate editor (I think) for one of the finest diving magazines around "Ocean Realm." I bought this book 20 years ago and still treasure it as one of my favorite photo books. If you can find this book, you will not be dissapointed.
