**Georgia Purdom : Galapagos Islands: A Different View** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Galapagos Islands: A Different View:

0 of 0 people found the following review helpful. Love it! By WilyJohnJB beautiful! 4 of 8 people found the following review helpful. Almost as good as a trip to the Islands! By NBrockmeier So much has been published about these remarkable Galapagos Islands. Before I read this book, I had the Islands on my "Bucket List". Having enjoyed this book edited by Purdom, the photos and discussions were so excellent, that I no longer feel compelled to tour the Islands in person. The various authors of separate sections each bring their unique perspective to the assembled book, some more effectively than others. The Creation/Evolution question is explored carefully for the reader, who could be as young as a third grader. 6 of 10 people found the following review helpful. Two Stars By Scott Youngstrom Pictures were incredible, however the biblical references threw us completely off guard. We attempted to send it back.

Observe the wondrous diversity of life, including birds, reptiles, and plants! Learn how Darwin's worldview and the biblical worldview differ and the importance of this in studying the Galapagos! With poignant chapters from Ken Ham, John Morris, John C. Whitcomb, Danny Faulkner, Gary Parker, and more! Where Darwin once visited and later used evidence from to support his faulty case for evolution, discover the wonder of God in this full-color book filled with vibrant images of these glorious islands in the Pacific, as well as powerful insights that give Him the glory due His name. Your faith will be strengthened as you learn the importance of a biblical worldview from some of the best apologetics speakers in the country. It's an overall emphasis on Galapagos as testament to God's majesty and mercy rather than the empty legacy of one man!

About the Author Dr. Purdom is a researcher and speaker for Answers in Genesis. She graduated with a Ph.D. in

Molecular Genetics from Ohio State University in 2000. Her specialty is cellular and molecular biology. Dr. Purdom's graduate work focused on genetic regulation of factors important for bone remodeling. She is a compelling and dynamic lecturer and well qualified to speak on the relevance of Genesis to the issue of biblical authority. She is the only female Ph.D. scientist engaged in full-time speaking and research for a biblical creationist organization in North America. Dr. Purdom is a member of the Creation Research Society and serves on the editorial board and executive council of BSG: A Creation Biology Study Group. She serves as a peer reviewer for Answers Research Journal and Creation Research Science Quarterly. She along with Dr. Joseph Francis of Master's College are co-founders of the Microbe Forum. This forum sponsors research, collaboration, and conferences in the field of creation microbiology.
