book and am going to go back and dig a little deeper--the author's suggestions, almost like guided imagery, are useful in really thinking about the kind of experiences one wants when traveling. 1 of 1 people found the following review helpful. Solo is now for me By Jean Sekula This is a great motivational book to get started on travelling solo. It addresses fears you may have about doing it yourself. I love the concept that solo does not necessarily mean alone; you can choose a group to join as a solo person. 1 of 1 people found the following review helpful. A must read! By Sarah Jean What an amazing read! Thanks to Jennifer and this wonderful book I was able to identify my personality type and set a plan for future career goals. I highly recommend this book to all.
