unexpected difficulties when doing even the simplest of tasks with kids to the most complex trips? This book is a very quick and easy read that helps ease that process, full of common sense ideas that are not commonly applied nor even thought about. I particularly like the blank "scrap" pages for personalized notes and places for the kids to draw on. Being a frugal person, my favorite parts of the books are the awesome "secrets" of savings, perks, rewards, etc. Those tips are HUGE!!! Highly recommended for anyone with kids. Also recommended even if you don't have kids but have family members with kids, grandkids, or friends with kids, etc. Probably the only ones not recommended for: bachelors thinking of proposing.

Kids activities travels. Do you fear activities and travels with your children? This book may help you with hints and tools to turn those fears into fun.
