**Robert Craig : Great Day Trips to Connecticut's Critical Habitats** before purchasing it in order to gage whether or not it would be worth my time, and all praised Great Day Trips to Connecticut's Critical Habitats:

0 of 0 people found the following review helpful. Five StarsBy Joan M. Josephgood resource0 of 0 people found the following review helpful. Five StarsBy elizabeth mirandaVery interesting read. I spent hours researching CT geography and found almost nothing. This was very helpful.0 of 0 people found the following review helpful. CT's natural wonders for all to seeBy Jill B. KoleszarA great book for hikers, birders or anyone who likes to get out and explore. I spent years hiking the same old woodsy places-until I discovered this book and all sorts of neat new placesI never knew existed. Would make for a nifty gift. Loved the black spruce bog and traprock ridges. I keep mine in the glove compartment(where it's always within reach)!

This book is a guide to Connecticut's natural habitat types. A great reference book in classrooms and at home about geology for kids. Discover Connecticut's natural places! Explore the state's 16 "critical habitats," the places that are essential to sustaining our native wildlife. Travel to the state's beaches and bogs, traprock ridges and high summits, rivers and marshes, and more! A must-have for hikers looking to explore Connecticut's most extraordinary natural places. Descriptions of trips to examples of all 16 of the state's critical habitats. Descriptions of the plants and animals that inhabit each of the critical habitats. Descriptions of the ecoregions of Connecticut. Read about current issues about species endangerment and wildlife management in the state. Written by Robert Craig, Ph. D., a leader of Connecticut's

own modern day "Lewis Clark" expedition in 1975, that completed the first ecological survey of the state. With paintings by Connecticut plein air landscape artist Barbara Lussier.
