Great Book, Good quality, Holds my goldfish attention spanBy Matt FleenerMy Fiance and I look through this frequently to determine where we'd like to go for our honey moon. Great coffee table book even if we didn't have a reason to look through it. Great pictures, fun facts. Will probably still look at it years into the future. Unless an alligator kills us on vacation (But I can't knock stars off for that). 10 outa 10 would take into the bathroom for a deuce any day of the week.0 of 0 people found the following review helpful.
