everything from its trail descriptions, to which forks to take for what results, to whether or not insects would bother us on a particular hike. We used it daily to plan our upcoming adventures. I appreciate having a hiking book geared toward young families, and this one surely enabled us to enjoy many great and unforgettable hiking experiences with our 3 children. I love the off the beaten path and hidden places that the author so expertly describes. Many times we felt that we were the only people in the park. 2 of 2 people found the following review helpful. Great book!! By Laura A. Reed I bought this book as a last minute item before our trip to the Grand Tetons. We traveled with our 7 and 10 year old children. We had the best family vacation and I contribute much of that to this guide. Each day we explored a new place and we were never disappointed. On our last full day in Wyoming, we found String Lake and it was breathtaking. After that find, none of us wanted to go back home. The author's description of every trail turned out to be true. We loved it. We didn't get through half of the trails we wanted to see so next year we will return with this trusty book in hand and continue to explore this beautiful part of our country. If you want to hike with your kids, this book is worth the money!

Written by the father of five avid hikers, this trail guide is based on years of field-tested hikes -- a genuine case of ""father knows best!"" Over thirty trails and walks, from short nature paths to overnight hikes in the Tetons/Jackson Hole area are detailed in maps, photos, and original illustrations.

Maps, photos and activities abound in this family guide which blends easy walks and short day trips with recommendations for full overnights and long-distance hikes in the Tetons. From wind caves to waterfalls, this is packed with excellent family references and candid assessments of family hiking opportunities for all levels of experience. -- Midwest Book
