It is quite expensive but he really looks forward to each issue, a different country each month, and asks me frequently whether it has arrived yet. Each issue consists of a small puzzle of the country, a well produced guide book to the country (age appropriate), a quiz book which requires the child to solve various puzzles with reference to the guide book. I have never had any trouble with being sent the publication after I have turned it down (I did infact cancel my subscription after my daughter decided she was not interested in the publication, then reinstated it a couple of years later when my son showed interest in her old materials). In short this is a quality publication which I would recommend to parents whose children enjoy reading, solving puzzles and discovering other cultures.4 of 6 people found the following review helpful. A trap - don't fall for it like my wife didBy D. CardenasThis is one of those products that keeps mailing stuff to you and charging you despite umpteen cancellations, notices of discontinuation, refusal to pay, etc.
