before purchasing it in order to gauge whether or not it would be worth my time, and all praised Gunnison, Pitkin (National Geographic Trails Illustrated Map):

The more you look at it, the easier it gets. Amazing how many hidden lakes and trails there are that you would not know about without this map. Pretty cool I guess, it just takes a while to get used to it. I bought three different ones, and I'm putting the same review on all of them.0 of 0 people found the following review helpful.
