Best mapBy Martin LabakTom Harrison maps are in my opinion the most valuable and useful maps out there of California back country. This is no exception. The trail is extremely well indicated on the map with section mileages; which is what makes Tom's maps far superior to any topo map out there. It is an excellent marriage of an already detailed USGS style maps and a trail type map.0 of 0 people found the following review helpful. Perfect!By CustomerWonderful lightweight detailed map. It was exactly what we expected. High quality, will not rip, coated so it will be okay if it rains.

The new Half Dome Trail map in Yosemite National park covers the area between Tenaya Lake and Glacier Point road, centered on the Half Dome. Map is at a scale where one inch represents a half-mile; durable waterproof plastic.
