**From Oxford University Press : Handbook of Australian, New Zealand and Antarctic Birds: Volume 7:
Boatbills to Starlings (Handbook of Australian, New Zealand Antarctic Birds)Part A Boatbills to Larks** before
purchasing it in order to gage whether or not it would be worth my time, and all praised Handbook of Australian, New
Zealand and Antarctic Birds: Volume 7: Boatbills to Starlings (Handbook of Australian, New Zealand Antarctic

Birds)Part A Boatbills to Larks:

The Handbook of Australian, New Zealand and Antarctic Birds is one of the world's major ornithological projects. This final volume, published in 2 parts, is the culmination of almost two decades of dedication by the editors, artists and volunteers who have now realized the vision to publish a comprehensive summary of our knowledge of all the known bird species that have been recorded in Australia, New Zealand and Antarctica.

"This is the best reference for the amazing birds of the HANZAB region and sets a high standard for similar handbooks around the world.... Whatever the future brings for revised editions, this series is a must for all libraries and an essential reference for anyone with an interest in the birds down under."--IBIS"These two volumes, which continue the most complete coverage of birds of this area, will be useful for all libraries."--ChoiceAbout the AuthorPeter Higgins is at HANZAB Projet Birds Australia. John Peter is at HANZAB Projet Birds Australia.
