**National Geographic Maps - Reference : Hawaii [Tubed] (National Geographic Reference Map)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Hawaii [Tubed] (National Geographic Reference Map):

0 of 0 people found the following review helpful. Good map to show the mountains, volcanos, and ocean depths By shepA very good map, showing the mountains and the ocean depths in pseudo-3D nicely. Too small to show much detail on the individual islands, but excellent to give the overview of the whole island group. Especially if you appreciate the remarkable geology of this place. 0 of 0 people found the following review helpful. Not laminated By David Stanton This map is not laminated - does not show detail I was hoping for - Big Island is barely on the map. 1 of 1 people found the following review helpful. Hawaii and its geologic connections By Marjorie This poster is my wall, and will remain for a while. It helped clarify the connections among several of the islands that we would see if sea level dropped--a good geologic addition to our trip to Hawaii. it would have rated a "5" in my estimation if it included Midway.

One of National Geographic's most visually stunning maps, the Hawai'i Map shows all eight of the major islands and includes an inset of the entire chain of reefs stretching nearly 3,000 miles across the central Pacific. In addition to showing all of the major land features, the map also shows the Hawaiian Ridge that runs under the islands, providing a wonderful perspective on how they were formed. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:773,000 Sheet Size = 34.75" x 22.75"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
