More on the web By A Customer I bought all of the books in this series but was very disappointed. The photos are good but there is no more information than you can already find on the net. Sites like hotelliving.com and Tablet are free and have the same photos but much more information. Try them instead. 2 of 4 people found the following review helpful. Hip Book By B. Yang Fun book! Excellent photographs. Reading about the various hotels from around the world and looking at the photos of the decor made me want to pack up my bags and do some traveling! The photos also gave me some ideas and inspiration on decorating my apartment.

The fourth in the series, revealing that all the ingredients that make a Hip Hotel - fantasy, originality, style, location - are available at less than astronomical rates, if you know where to look: urban or remote, historic or post-industrial,

Sunset Boulevard or the Australian outback.

"Hotels so stunning, so individual, so undeniably designer destinations in their own right." About the Author Herbert Ypma is the author and photographer who created the popular Hip Hotels series. His previous books include *Maison: Christian Liaigre*.
