**National Geographic Maps - Reference : United States Classic Wall Map (tubed)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised United States Classic Wall Map (tubed):

9 of 9 people found the following review helpful. great US map By Paula AI used it to display state shaped photos of the places we have visited, thanks Pinterest for the wonderful idea 6 of 7 people found the following review helpful. Smaller than I expected based on reviews; don't co-order with heavy items. By JJI had to dig into the product description (this information is not visible unless you click a link) to find out that the actual size is 43.5" x 30.5". Not 4 feet by 6 feet as others have claimed! Also, the map is not laminated, don't write on it! The tube was slightly crushed due to my decision to order this along with a heavy item, which was shipped in the same box. So the map is slightly crumpled in one area. I've seen a much nicer and larger NatGeo map with a wooden frame around it, and its available on Amazon, but it is out of my price range. I've gotten a larger (and laminated) US map from a different publisher that I like better, and its only slightly more expensive. 12 of 12 people found the following review helpful. Nice overview map By ROBIN Decent quality paper map that came well packaged and in good condition. Not quite as much detail with roads as I had hoped, but is adequate for mapping vacation trips.
