Great for photographers to know where to get "that shot" By Ron Martensen of ronmartblog Vista Manhattan: Views from New York City's Finest Residences is a coffee table book that offers a variety of interesting views of Manhattan from all around the city. What's unique about this one is that it actually includes where the shots were taken and on what floor, so if you are a photographer looking to get a great shot of New York from one of these viewpoints it can prove to be an invaluable resource. Mike Tauber's images in the book don't have the same punch that you see on his web sites due to the lack of back lighting that you enjoy on your monitor, but that gives it a feel that is reminiscent of looking at film from decades past. I wish the images were a bit sharper and more vivid, but this is a personal preference of mine as I've spent years as a fine art photography printer. For those readers who are from New York it is certain to strike up a sense of nostalgia that leaves the mind wandering off to memory lane. It's a picture book, not a novel, so it makes it an interesting flip through on the coffee table or professional office lobby.

These 200 images show you the spectacular views from hundreds of New York City's finest residences. Everyone loves an amazing view, and some pay millions for a property with views across Central Park, the East River, the Hudson River, or the Midtown skyline. In the jungle of glass, stone, and steel that is New York City, it is impossible to overstate the value of an incredible view. Tauber, a Manhattan-based independent photographer, shot these images over the last decade while shooting New York City's finest properties for real estate firms, architects, interior designers, developers, and magazines. This collection reflects the shimmering pull of New York City views through the seasons, from morning light over Central Park to twilight over the Hudson.
