So far it has been very helpful in finding campsites, islands, trails measuring distances getting coordinates and finding boarders and general where is this in the park kind of answers. I havent used it on the ground so I have no physical comparison, but it has been a great addition to my tools for dispatching.0 of 0 people found the following review helpful. CassThis is a nicely illustrated map which I am glad to have in my collection of maps of the area. I was a bit disappointed to discover that it is, in my opinion, not a particularly good canoeing area. It is more historic and "big lake" than what I am looking for in a canoe area. Perhaps others who enjoy paddling on big lakes will think otherwise. Dave Cass, Edmonton, Alberta
