Farouk El-Baz : Wadis of Oman: Satellite Image Atlas before purchasing it in order to gage whether or not it would be worth my time, and all praised Wadis of Oman: Satellite Image Atlas:

This spectacular atlas provides in-depth information on the wadis of Oman, based on the study and analysis of satellite images at the Boston University Centre for Remote Sensing. These clear, precise large-scale maps identify individual wadis and potentially hazardous areas that are prone to flash-floods, while the maps of drainage patterns help to identify locations with potential for groundwater resources. This is a magnificently produced atlas and an important

work of reference.
