A lot of the speech came off a bit flowery, but not so much that you needed footnotes to explain what they meant. The details were, at times, a bit painful to read (I refer specifically to the times some act of animal cruelty was mentioned - i.e. poisoning of the dog to show just how lethal and fast acting a certain poison was). Some of my favorite parts was when he was describing the animals, specifically the sloths, and out of all the journeys, the third was my favorite solely because a large chunk of it talked about the animals there. My only complaint is how the book was broken up. It's great he separated the journeys but I wish there were chapter breaks in the journeys because running it all together made it seem a little tedious and, at times, confusing. 1 of 1 people found the following review helpful. Armchair travel. By Christopher C. Elliott Anyone interested in Latin America jungles by foot? Waterton endures language barriers and jungle fever. Addicted to traveling, his narration of his 1816-1824 journeys are lightening informative, as well as his opinion of humanity around him. His old English could use some defining but does not deter your interest. 0 of 1 people found the following review helpful. Five Stars. By globaltrekkie Good "lost" stories. Got this for my mother who is from the area Waterton is talking about.
