It is nicely durable plastic, not paper so it will handle a lot of use and abuse. It is a little bit dated in road conditions: portions of Route 40 are now paved which are marked as gravel on the map. It also doesn't give a lot of fine detail, but being an overview map of a fairly large country I wouldn't expect that. I also wish it would give highway distances between points, but it is great though for navigating between towns in Argentina.2 of 3 people found the following review helpful. No BuenoBy Alexandra J. SainsburyI bought this map to plan our Patagonia trip - it is missing many of the major destinations that we want to visit. I would like to send it back.
