Great map, with glossy, durable, and colorful print. Trails are all clearly marked, as well as many local points of interest. The only negative (in comparison to the AMC maps) is that the peaks do not seem to be quite as pronounced, so it's a little more challenging to find the actual peak.  
Other than that, quite nice to be able to bring just TWO maps and have the entire White Mountain range covered! :)

I have used Nat Geo maps for years and this one is no different. Fairly up to date, excellent detail, tough and easy to read. My 8 year old and I used this over the summer and it held up nicely after constantly folding up, placing in pockets and taking them out again.
