Ed Darack : Wild Winds: Adventures in the Highest Andes before purchasing it in order to gage whether or not it would be worth my time, and all praised Wild Winds: Adventures in the Highest Andes:

2 of 3 people found the following review helpful. Good Overview of Andes ClimbingBy A. PulsipherThis is an easy-to-read book about the author's adventures (and misadventures) climbing 5 mountains in the Andes Range of South America. The author writes well and articulates many of the difficulties Americans would have climbing in South America...particularly those peaks off the beaten path such as Llullaillaco, Nevado Sajama, Cerro Pissis and Ojos De

Salado. The author has a good story to tell...and it is a good read. The black and white pictures are okay, but a professional photographer such as the author should have included more and better prints. 0 of 1 people found the following review helpful. Superb! By CustomerA superb book. Highly recommended first-hand descriptions of fantastic climbs in the Andes. Full of interesting histories and facts. Outstanding!

Wild Winds chronicles climbing expeditions to Aconcagua (South America's highest mountain), Ojos del Salado (South America's second highest mountain), Cerro Pissis (South America's third highest mountain), Lulllaillaco, and Sajama (Bolivia's highest mountain). The book contains hundreds of photographs and a wide variety of maps. This book is perfect for anyone interested in Aconcagua, other high peaks of the Andes, or general adventure travel literature. This book is unique in that it is both an adventure travel (mountaineering) work, and has many guide attributes.

Wild Winds is a must-have book to add to your collection. -- South American Explorer Magazine
About the Author Ed Darack is a photographer, writer and cartographer based out of Colorado and California. He began pursuing photography and writing professionally during his work at the University of California at Davis. He received a bachelor of science in physical geography in 1993 and then continued his creative work full time. He has published a large line of notecards, posters, and his first book, 6194 Denali Solo. He has lectured to a wide array of distinguished organizations, including the Explorers' Club, the Sierra Club, the New York Academy of Sciences, and many others.
