Really fun to read book.By Igloo98A little different South Pole expedition. Norman Vaughan has a grand sense of and desire for adventure. I met this guy one time in Alaska. He ran the Iditarod a few times in recent years too. It is why he went to the South Pole with Byrd, to care for the dogs. The relationships among the people on this adventure make this story interesting as well as the challenges the environment posed. Fun to read.

This book describes the drama, humor, human interest and close up look at the explorer.

From Library JournalA fascinating account of a Harvard dropout who became dog handler on Byrd's 1928-30 expedition to Antarctica. Vaughan has many interesting anecdotes of a life that has been full and varied, as evidenced by the fact that he is 85 and still mushing. The story, like the author's life, suffers a letdown when Vaughan returns from Little America to begin a career in advertising. But the expedition account is riveting, and there are hints of later excitement. The book is a bit unfocused, however, and it is uncertain whether this is an autobiography, a biography of Byrd, or an account of a polar exploration.
