National Geographic Maps - Reference : World Decorator [Enlarged and Laminated] (National Geographic Reference Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised World Decorator [Enlarged and Laminated] (National Geographic Reference Map):

12 of 12 people found the following review helpful. Map is big, gorgeous and somebody had folded it By Karen M. Brownfield When you order a map that is this big and it's laminated, you expect that it would have been stored rolled up. It was delivered in the box rolled up, but it was obvious from the deep regular creases in the lamination that it had been folded and stored flat. While I was able to iron it flat, the creases left by the fold are still very obvious and spoil the beauty of the map. 3 of 3 people found the following review helpful. This is one big map and easy to use By JDWP This is one big map and easy to use. I bought this to help my grandchildren familiarize themselves with the world around them. Once you find a wall big enough to hang it, you will find it a great map to use. The fact that it is laminated is an absolute plus. 2 of 2 people found the following review helpful. Nice addition to my office By KP Jandt As you can tell by the site advertisement it is quit large. It fit well on the wall right above my roll top desk. I have wanted a large world map to display in my office for a long time. I'm glad I purchased this map. It is easy to read, nice to look at, and fits well into my office. In one corner of the map display there are the largest countries (in square miles) and largest countries in population. The other corners have Land Cover, and Land Form Maps. The top two corners have upper and lower Arctic Regions. The variety of colors to differentiate the countries look great. I'm quit happy with my purchase!

National Geographic's World map is the standard by which all other reference maps are measured. The World map is meticulously researched and adheres to National Geographic's convention of making independent, apolitical decisions based on extensive research using multiple authoritative source. The Decorator style World map uses a vibrant color palette that fills each country for easy identification and stunning shaded relief that will stand out as a beautiful piece

of cartographic artistry. Drawn in the Winkel Tripel projection, distortions are minimized and unlike many other World maps, Greenland is shown the same size as Argentina and not as the size of all of South America. Thousands of place names are carefully and artistically placed on the map to maintain legibility even in the heavily populated areas of Europe, Asia and the Middle East. Details include clearly defined international boundaries, cities, physical features, rivers, and ocean floor features. Corner inset maps feature vegetation and land use, and population density as well as the north and south polar regions. Enlarged maps provide an immersive experience in any home or office environment. The exceptional cartography is even easier to appreciate at the larger size. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:18,366,000 Sheet Size = 73" x 48"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
