National Geographic Maps - Reference : World Decorator [Laminated] (National Geographic Reference Map)
before purchasing it in order to gage whether or not it would be worth my time, and all praised World Decorator [Laminated] (National Geographic Reference Map):

139 of 144 people found the following review helpful. The Map to SuccessBy DaniellIf you are looking for an honest review of this product then you are in the right place. I received this map just a few days ago to replace my new one and I can honestly say that this map is perfect. It comes laminated out of the box so don't expect it to be ripping on you anytime soon. Not only is the durability of the map impressive the actual image of the map is very sharp. The colors have a good contrast and overall brightness is just where it needs to be. Another thing of note would be that this map has a peculiar black outline added to it. I personally think it has a cool "frame" look to it and appreciate it as a refining contribution to the appearance. One thing that all should note is that it is quite a big map, so you should definitely make sure there is space for it. Overall, as I'm sure this review has made clear, this map is of perfect quality for anyone who wants a durable, large, and colorful map for there viewing pleasure.0 of 0 people found the following review helpful. Looks NiceBy Kari DI got this as a gift for my husband - he wants to start a pin map to mark where we've travelled. It is a really nicely laminated map. I like it a lot and am looking forward to affixing it to cork board and putting it up when we move.1 of 1 people found the following review helpful. Five StarsBy CustomerPerfect in my office. The colors are great and the size is perfect.

National Geographic's World map is the standard by which all other reference maps are measured. The World map is meticulously researched and adheres to National Geographic's convention of making independent, apolitical decisions based on extensive research using multiple authoritative source.The Decorator style World map uses a vibrant color palette that fills each country for easy identification and stunning shaded relief that will stand out as a beautiful piece of cartographic artistry. Drawn in the Winkel Tripel projection, distortions are minimized and unlike many other

World maps, Greenland is show the same size as Argentina and not as the size of all of South America. Thousands of place names are carefully and artistically placed on the map to maintain legibility even in the heavily populated ares of Europe, Asia and the Middle East. Details include clearly defined international boundaries, cities, physical features, rivers, and ocean floor features. Corner inset maps feature vegetation and land use, and population density as well as the north and south polar regions. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the fames can be much lighter and less expensive. Map Scale = 1:29,802,000 Sheet Size = 46" x 30.5"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
