**National Geographic Maps - Reference : World Executive Political Wall Map (Enlarged Size Tubed World Map)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised World Executive Political Wall Map (Enlarged Size Tubed World Map):

0 of 0 people found the following review helpful. Elegant. Beautiful. Perfect. By Marisa Ramcharan Not to be a drama queen... but, wow... I carefully read reviews before taking a decision on which World Map to purchase. I wanted it to be: 1) factually correct 2) large 3) aesthetically pleasing Nat Geo checked the first criterion. As for point two, it is true to advertised size (73"x48"). And point three - my goodness, the colours are warm and earthy. Some of the bluish tone ocean maps I looked at seemed "better", but I have zero buyers' regret with this purchase! The packaging was also superbly adequate! I bought the non-laminated one, and it came in a sturdy but light-weight, transparent plastic tube, 4 feet long, and the length of the map neatly rolled inside. The extra shipping I needed to get it from the US to where I live in the Caribbean had this plastic tube encased in a further cardboard tube, three inches in diameter. I read reviews that complained about maps arriving creased and damaged; mine was in perfect condition! Beyond the product itself, I have rave reviews for the packaging, shipping and handling of the product! I have to mount it, and will duly take photos and post with this review, The intention I have is to affix it to a styro-foam sheet (said sheet comes in 4'x8'x1/2"). Again, I cannot emphasize enough how pleased I am with this choice, and for the price, it was so worth it, I may buy more in it... I highly, HIGHLY, recommend! :D 2 of 2 people found the following review helpful. A fun way to map your travels. By Customer I purchased the larger size of this map. It has a matte type finish, which seems durable, but it is NOT laminated. It fits nicely on a \$5 piece of foam insulation and looks great on a wall with some pins in it. Highly recommended for people who wish to pin their destinations or possess a highly detailed, tastefully colored map. 7 of 8 people found the following review helpful. Is NOT Laminated!! By Saved by Southern Charm The "Traditional" that is sold by \*IS\* laminated, but it is \$48 which makes it steep for a map without a frame. The "basic size" and "enlarged tubed" that are sold by PosterRevolution are NOT laminated (I contacted them on 12/29/13 and they confirmed this). Their large size is \$28 which is very steep for a non-laminated piece of paper. Maps, Globes, and

More advertised the "enlarged tubed" as having "laminated paper," but they shipped me a non-laminated map. Had I not taken a screen shot of their description at the time I ordered it, I would have had to pay for return shipping out of my own pocket. Be aware that no one is selling a laminated version of the "enlarged tubed" map anymore. The laminated 48x73 map is AWESOME -- I've received tons of compliments on it and refer to it often. I had some leftover baseboard from my house renovation that I spray painted Dark Walnut and used to frame this map.....great way to dress a huge blank wall.

National Geographic's World map is the standard by which all other reference maps are measured. The World map is meticulously researched and adheres to National Geographic's convention of making independent, apolitical decisions based on extensive research using multiple authoritative source, The Executive style World map uses an antique-style color palette and stunning shaded relief that provide a richness perfect for any decor. Drawn in the Winkel Tripel projection, distortions are minimized and unlike many other World maps, Greenland is show the same size as Argentina and not as the size of all of South America. Thousands of place names are carefully and artistically placed on the map to maintain legibility even in the heavily populated ares of Europe, Asia and the Middle East. Details include clearly defined international boundaries, cities, physical features, rivers, and ocean floor features. Corner inset maps feature vegetation and land use, and population density as well as the north and south polar regions. Enlarged maps provide an immersive experience in any home or office environment. The exceptional cartography is even easier to appreciate at the larger size. The map is packaged in a two inch diamater clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:18,390,000 Sheet Size = 73" x 48"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
