### **National Geographic Maps - Reference : World Explorer [Tubed] (National Geographic Reference Map)**

before purchasing it in order to gauge whether or not it would be worth my time, and all praised World Explorer [Tubed] (National Geographic Reference Map):

0 of 0 people found the following review helpful. Great size By Debi's review... This map was a great size for my daughter's dorm room. The map arrived in a tube and was in perfect condition.

National Geographic's World map is the standard by which all other reference maps are measured. The World map is meticulously researched and adheres to National Geographic's convention of making independent, apolitical decisions based on extensive research using multiple authoritative source. The Explorer style World map uses a vibrant color palette that fills each country for easy identification, stunning shaded relief, and a light blue background grid pattern that echoes the cartographic precision that underlies all National Geographic maps. Drawn in the Winkel Tripel projection, distortions are minimized and unlike many other World maps, Greenland is shown the same size as Argentina and not as the size of all of South America. Thousands of place names are carefully and artistically placed on the map to maintain legibility even in the heavily populated areas of Europe, Asia and the Middle East. Details include clearly defined international boundaries, cities, physical features, rivers, and ocean floor features. Inset charts list the largest cities by population and the largest countries by land mass and population. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:42,334,000 Sheet Size = 32" x 20"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
