SparkNotes : World Map SparkCharts before purchasing it in order to gage whether or not it would be worth my time, and all praised World Map SparkCharts:

Shows half the world one side and half on the otherBy Hiking MomIt looks nice, but it has half the world on one side, and the other half of the world on the other side. This design allows for the countries to be larger for viewing, but it is difficult to use the map to illustrate travel from one part of the world to another, so it isn't really working for our purposes. The map unfolds to approximately 11x17, and it has 3 holes to fit into a binder, so it is a nice size to carry. It isn't fully laminated and won't last all that long with regular use.0 of 0 people found the following review helpful.
