National Geographic Maps - Reference : World Physical [Enlarged and Laminated] (National Geographic Reference Map) before purchasing it in order to gauge whether or not it would be worth my time, and all praised World Physical [Enlarged and Laminated] (National Geographic Reference Map):

National Geographic's The Physical World map highlights the Earth's land and undersea forms with exquisite hand-painted relief. Drawn in the Winkler Tripel projection, distortions are minimized and unlike many other World maps, Greenland is shown the same size as Argentina and not as the size of all of South America. Two corner inset maps show the Earth's crust and world climatic zones. Enlarged maps provide an immersive experience in any home or office environment. The exceptional cartography is even easier to appreciate at the larger size. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:19,463,000 Sheet Size = 69.25" x 46.25"
