World Railway Gauge Map

With Strategic Plan

Scale: 1 : 43,500,000 1" = 686 miles 1cm = 435 kms
Sheet Size: NS x EW 28 x 38 inches 71 x 96 centimetres

Included with this map is an international survey booklet, which describes, continent by continent, the potentialities of railway development that lie within our grasp. It is a thought provoking document which indicates just what could be done to transform, dramatically, the nature of global rail services at the start of this new millennium.

It is written in plain language not only for the railway buffs, but also for the many people, world wide who take an interest in railway development. Many of these, while aware that something might be done to develop strategic links, would welcome a programme of constructive suggestions.

Here is that programme!
