#675189 in Books National Geographic 2010-01-01 Format: Folded Map Original language: English PDF # 3  
7.50 x .40 x 4.00l, .60 Binding: Map 8 pages National Geographic Maps: National Geographic's waterproof

and tear-resistant maps provide travelers with the perfect combination of detail and perspective, a necessity for any adventure. Pocket Naturalist Guides: Waterford Press' Pocket Naturalist Guides are filled with accurate and lifelike illustrations of the wildlife you are likely to encounter on your travels. | File size: 48.Mb

**National Geographic Maps - Trails Illustrated : Yellowstone National Park [Map Pack Bundle] (National Geographic Map) (National Geographic Trails Illustrated Map)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Yellowstone National Park [Map Pack Bundle] (National Geographic Map) (National Geographic Trails Illustrated Map):

1 of 1 people found the following review helpful. A good overview  
By Eric S. Anderson  
Grand Teton National Park (National Geographic Trails Illustrated Map) Map Folded Map, January 1, 2008 \$10.65 and Yellowstone National Park (National Geographic Trails Illustrated Map) Map Folded Map, January 1, 2012 \$10.65  
Save the content these maps are identical in size each being 25 x 37 YPK scale is 1:16,720 1 inch = 2 mi. with 100 contour level. GTNP scale is 1:80,000 1 inch = 1.3 mi 100 contour level. These maps are printed on waterproof, tear-resistant paper. YPK is split in half (north / south) with a generous overlap. Robust legend includes trail summaries including length, elevation gain, hiking time and difficulty. Various other panels describe wildlife, thermal areas and backcountry hiking. GTNP has the entire area on one side (including Jackson Hole) the reverse is a detailed map of the east side of the park with a scale of 1 inch=.5 mi. from Granite Canyon to Leigh Lake. As mentioned elsewhere we are not of the hiking ilk, other than the short easy 1-2 hour jaunts to get away from the parking lots. In terms of general orientation, finding locations mentioned in other tomes, and getting around these are essential maps. In terms of a hiking guide with trailheads and enough detail to use in the field I fear these would be lacking. Used in combination with National Geographic Yellowstone and Grand Teton National Parks Road Guide: The Essential Guide for Motorists I plan them to use them as my principal navigation tools.

By Always Buying Something  
It serves the purpose. The two problems I have with all these maps is the ledger colors are so close to the same for biking and hiking Its almost impossible to tell the difference. The second problems there is not a lot of difference in the detail between the main map that covers the whole part and the area maps that are suppose to give more detail. I could have easily gotten by with just the main map and saved a little money.

By Wally  
I like to hike in the national parks and use Trails Illustrated maps when they are available. Trail books often have small maps of the trails they describe, and those maps are fine for short hikes, but it's a good idea to have a larger topographic map for longer hikes. TI maps are durable and have a water resistant coating. (Good for when you get caught in the rain; probably less so if you fall in a creek.) TI maps mark the trails and their topographic features. The elevation markings give you a good idea of how steep a portion of a trail is. I've used TI's Yellowstone map for several trails and always found them to be accurate and helpful. I recently purchased the 2008 revision. Unfolded, the map paper is the same size as the 1998 revision, but feels substantially heavier. The park map, however, is now a bit bigger and is split with the north half of the park on one side and the south on the other (with a generous overlap between the two). The written information about the park that was previously on the back is still present, but is reduced in size and located in several smaller boxes spread around the map. A new feature is that the information on the map does not end abruptly at the park boundary. Thus, for example, if you use the north entrance to the park you can see some additional trails, picnic, camping, and fishing areas marked to the north of the park as you come in on US 89. I don't use it, but the map now indicates that it is GPS compatible with a full UTM grid. TI's Yellowstone map is worth having if you plan to do any hikes longer than a few miles. The 2008 is a good buy, particularly if you have an older revision that is showing some wear. If your older revision is in good shape (they are durable after all!) you can probably get by with it.

Waterproof Tear-Resistant Topographic Map  
Seeking the best combination of detailed maps and value for your Yellowstone National Parks trip, then get our bundle pack. It includes four Yellowstone National Park Trails Illustrated maps, providing you coverage of the entire map region, while saving you over 15%. Like all Trails Illustrated maps, the Yellowstone National Park Bundle set is frequently revised and printed on waterproof, tear-resistant material to stand up to all conditions. This detailed topographic recreation map bundle contains carefully researched trails, campsites, forest service roads, and points-of-interests. Includes UTM grids for use with your GPS unit. Coverage includes the entire Yellowstone National Park, Old Faithful, Yellowstone Lake, Mammoth Hot Springs, Gallatin National Forest and more. Folded Size = 4 x 7.5 Scale = 1:70,000

About the Author  
Founded in 1915 as the Cartographic Group, the first division of the National Geographic Society,

National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world. All proceeds from the sale of National Geographic maps go to support the Society's non-profit mission to increase global understanding and promote conservation of our planet through exploration, research, and education.
