Surprisingly, even though it has tons of birds, it doesn't have the Red-breasted Merganser that we saw swim by just a few feet from us (we had to refer to the same company's "California Birds" to identify them). So while none of these pocket guides can possibly be complete, they are lightweight, sturdy, and a wonderful addition to your pack. I'd suggest having a few: some for your region, and one for the specific place you're going, if available. 0 of 0 people found the following review helpful. Wildlife Guide By Paul Gamer I bought this guide to help me identify birds and other wildlife on an upcoming trip. I have several from other places and they help me to identify wildlife without a heavy nature book. 0 of 0 people found the following review helpful. guide By Angelo Arenaas advertised

One of the most famous scenic places on earth, the Yosemite Region is highlighted by Yosemite National Park's famous granite cliffs and waterfalls and the world's largest trees in Sequoia National Park. This beautifully illustrated guide highlights over 140 familiar and unique species of mammals, birds, reptiles amphibians and butterflies. It also features a map that points out the area's prime wildlife viewing hotspots. Laminated for durability, this portable guide is a great source of quick and accurate information for nature lovers of all ages. Made in the USA.

Waterford Press offers . . . different titles such as Backyard Birds and Birds of Prey . . . although these contain only simple listings of the most common types in your area, its amazing how many species they pack into these inexpensive heavy duty cards. An added benefit is that they can be folded to create a book-like spine for easy display. -- Birding Business, Trends in Books There are dozens of these stunningly illustrated pocket guides to nature. They easily fit in a shirt pocket with space left for note paper and pen. While you won't want to discard your bulky bird, flower, tree, etc. books, these are ideal casual identification guides. In addition to the illustrations, there is enough descriptive material on each species to key in on and then follow-up when it is convenient to scour the books for greater details and confirmation. If we ran a store that catered to outdoor enthusiasts, we'd sure have some of these in the rack. -- Shep, Bookshelf Nature lovers may want to look into an expanding series of pocket guides from Waterford Press. The Pocket naturalist series has something for everyone's backyard. The laminated foldouts feature up to 150 items per guide on topics such as urban wildlife, backyard, birds, pond life, the night sky, and wildflowers. There are also regional, state and city guides for even more specific information. Each water-and-dirt-resistant guide sells for \$5.95. -- Garden Ideas and Outdoor Living
