Christine Macel : Ziad Antar: Portrait of a Territory before purchasing it in order to gauge whether or not it would be worth my time, and all praised Ziad Antar: Portrait of a Territory:

This volume presents a seven-year project by Lebanese photographer Ziad Antar (born 1978), for which he recorded the coastline of the United Arab Emirates between 2004 and 2011. Portrait of a Territory tells the story of an economic boom and its shortcomings through images of both monumental architectural structures and the abandoned work sites of unfinished construction projects.
